## A proud history

The Group was created in 2000 through a complex merger of First Merchant Bank (FMB), UDC and Bard group of Companies. FMB had previously merged with Heritage Investment Bank, a small but highly innovative Merchant Bank in 1997. Originally, the bank focused exclusively on corporate and wholesale banking. In 2008 the bank started to expand into the retail banking space, developing a comprehensive set of retail services including SME and micro lending products. This expansion which was funded entirely from internal resources, has accelerated the bank’s growth in recent years.

We have seen tremendous growth in all metrics
We have been supported by a strong shareholding

BancABC has strong controlling shareholder due to the strategic alignment between African Development Corporation (ADC) and management, controlling over 68% of the shares. ADC views the cooperation as an excellent combination of the operational bank management skills in BancABC, combined with the fundraising and investing expertise at ADC. ADC (Bloomberg: AZC.GR, www.african-development.com) is a German stock exchange listed pan-African banking group focusing on sub-Saharan Africa’s banking markets as well as on proprietary investments in selected frontier markets.

“Group Risk Management continually seeks to enhance its risk management techniques and provide assurance that risks are identified, monitored and controlled appropriately.”

The directorate and management of ABC Holdings recognise that effective risk management is fundamental to the sustainability of its business. A strong risk management culture within the Group ensures an appropriate balance between the diverse risks and rewards inherent in any transaction and underpins sound decision making. Accordingly, a comprehensive risk management process is in place to evaluate, monitor and manage the principal risks the Group assumes in conducting its activities. In the course of conducting its business, the Group is exposed to various risks inherent in providing financial services. These risks are managed according to established risk management policies and procedures.

OUR SUSTAINABILITY PILLARS

As an emerging pan-African financial institution, BancABC recognises that it has a responsibility to uplift and play an active role in the communities in which it operates by supporting two pillars it has identified for action, namely:

We strive to invest in sustainable projects and, through the involvement of our staff, actively demonstrate our goodwill and commitment to enhancing the lives of the people directly and indirectly impacted by our banking activities:

“In the past twelve years, we have successfully cemented our corporate and investment business while accelerating our retail expansion within five markets in SADC, funded entirely from internal resources. Our growth across all metrics has been very strong, highly capital intensive and liquidity consumptive. Now, upon raising immediate additional capital and credit lines necessary for the realisation of our key operational objectives, the Group will surely be closer to achieving our vision of being the preferred banking partner in Africa.”
